

## Situation Summary

- **Out of total 399,749 confirmed cases reported in the Philippines until today, 55% are male, with the most affected age group 20-29 years (26.4%) followed by 30-39 years (24%).**
- 47.4% of cases reported from National Capital Region (NCR), followed by CALABARZON (18%), Central Visayas (6%), and Central Luzon (6%). Largest increase in new cases from NCR.
- **Out of 7,661 confirmed deaths, 60% are male, with the most affected age group aged over 70 (34.4%) followed by 60-69 years (27.4%)**
- 45.2% of deaths reported from NCR, followed by Central Visayas (17.4%), CALABARZON (12%), and Western Visayas (6%). Largest increase in new deaths from NCR.
- **Department of Health (DOH) and WHO emphasizing the need for compliance to, and proper implementation of, national guidelines at LGU level**
- 98.8% of health facilities daily reporting to DOH's DataCollectApp showing 39.2% occupancy rate of ward, ICU and isolation beds for COVID-19 patients nationally. In NCR, out of 161 health facilities, 40.4% of dedicated COVID-19 beds are occupied. In CALABARZON, 221 health facilities report 45.4% occupancy rate of dedicated COVID-19 beds.
- **Currently 124 laboratories using RT-PCR are accredited for COVID-19 testing, as well as 38 laboratories using GeneXpert.**
- COVID-19 infection among United Nations personnel – 1 WHO

## PHILIPPINES SITUATION IN NUMBERS

## Upcoming Events and Priorities

All Filipinos will receive the safe and effective coronavirus vaccine under the national vaccination roadmap. However, the country's poor, frontliners, soldiers, cops, and other servicemen would be given priority in the vaccination program of the government. Under the roadmap, the government hopes the plans on vaccine selection as well as access and acquisition stages would be completed from November to December 2020. Safety and efficacy will be crucial considerations in the selection of the potential COVID vaccine, as well as if single or two doses will be needed. The availability of the vaccine will be a game-changer, where we go from avoidance to actively minimizing the threat of the infection.

The health department on Monday warned the public against caroling as loud singing increases the risk of coronavirus transmission, quoting a study which showed singing loudly was the topmost activity that yields the most virus. The agency earlier released guidelines on holiday celebrations and urged limited face-to-face activities. The DOH also urged the public to practice minimum health standards such as wearing of face masks, face shield and frequent handwashing.

New guidelines have been released to ensure the health and safety of passengers of motorcycle taxis when they resume operations. Among the new guidelines are the need for

passengers to wear their own helmet with visor on top of the wearing of face mask, installing barriers between driver and passenger, and the transition to cashless transactions. The resumption of motorcycle taxi operations will be an extension of the initial pilot run to aid legislation on possibly fully legalizing the service and will likely run for six months.

## National Transmission Assessment

At national level, the Philippines remains in **Stage 2, localised community transmission** with some geographic areas showing higher transmission intensity and indications of wide spread community transmission. There is ongoing evidence of an increasing trend in the number of cases and higher transmission in Region 3 and Region 4A, and a decreasing trend in the NCR. At national level, the bed occupancy rate for COVID-19 allocated beds is currently at 39.2% occupancy, with variation between Regions. Additional beds are being allocated for COVID-19 cases, as per the direction of the government. In the past weeks there seem to have been a decrease in daily reported cases, deaths and recoveries by as much as 25%. Recently DOH has changed the reporting of recovered cases based on the national criteria. Mild and asymptomatic cases are tagged as recovered 14 days after onset or specimen collection. Additional data validation and harmonisation efforts are ongoing. The government is responding across sectors, including through enhanced community engagement, targeted isolation and quarantine measures, expansion of contact tracing and continuous increase in laboratory capacity.

## Epidemiology

As of 10 Nov, a total of 399,749 confirmed COVID-19 cases including 7,661 deaths have been reported in the Philippines. The proportion of deaths among COVID-19 confirmed cases is now 1.9%.

Epidemiological Update	Tests	Cases	Deaths	ICU
COVID-19	231,622	12,599	343	46%
Data reported on	Tests past 7 days	New cases past 7 days	Deaths past 7 days	ICU Utilization Rate past 7 days
10 Nov 2020 compared with data reported on 3 Nov 2020	4,815,681	399,749	7,661	1,889
(% difference compared to previous 7 days)	Cumulative Unique Individuals Tested	Cumulative Cases	Cumulative Deaths	COVID-19 ICU beds
	9.4%			
Health Service Provision	14,757	230	1,271	17,733
COVID-19	Health care workers trained on IPC	Healthcare worker cases reported past 7 days	Hospitals admitting COVID-19 patients	Non-ICU Hospital beds
	11,333			169,342
	Community workers trained on IPC			Hospital beds in TTMF

18 January-10 November 2020 (N=399,749)

**Map of confirmed COVID-19 cases by city/municipality**

18 January-10 November 2020 (N=399,749)

## Strategic Approach

73 barangays in the City of Manila that managed to be free of COVID-19 infections for the whole months of September and October received P100,000 from the city mayor as cash incentives. This is in line with the city's approach to incentivize barangays to stop the spread of the virus. As of Nov. 6, Manila has 21,108 confirmed COVID-19 cases. Of this number, 480 are active cases, 20,009 have recovered, while 619 died.

The Philippines will procure 50 million doses of COVID-19 vaccines by 2021, enough for 25 millions Filipinos at 2 doses each. The government is in talks with embassies of different countries for government-to-government and multilateral arrangements. The government may be able to get 10-15 millions doses by May to July 2021 and the rest by the end of 2021 to early 2022 at worst owing to the huge demand globally for the vaccines.

## Laboratory strengthening

There are currently 124 laboratories certified to conduct COVID-19 testing by DOH using RT-PCR technology, as well as 38 laboratories using GeneXpert, with an additional 95 public and private laboratories under assessment.

## Non-Pharmaceutical Interventions (NPI)

**Figure: Timeline of NPIs with EPI curve combined with NPI implementation dates**  
16 January-10 November 2020

NPI	Monitoring status					
	Date first implemented	Date last modified	Implementation		Lifted for some areas	Lifted for all areas
			Geo-graphical	Recommended /Required		
Wearing Face Masks, Hand Hygiene, Respiratory Etiquette	13 March	-	National	Required	No	No
School Closure	10 March – Metro Manila	3 June	National	Required	3 June with limitations	No
Workplace Closure	13 March	4 Aug	National	Required	15 May	No
Mass Gatherings	10 March – Metro Manila	4 Aug	National	Required	3 June with limitations	No
Stay at Home	13 March	4 Aug	National	Required	15 May	No
Restrictions on Internal Movement (within country)	13 March	4 Aug	National	Required	1 June	No
Restrictions on International Travel	31 Jan - China	4 Aug	National	Required	1 June	No
Others; specify in narrative	None	None	-	-	-	-
